## Notice of Change on product specification

We would like to inform you the specification changes of the water purification material MiraCarbon.

The changes on the specification are as follows:

Specification change on CarbonFiber was made to improve its performance as a water purification material and to improve its durability. Along with the CarbonFiber specification change, MiraCarbon products specification will change as well. We sincerely apologize for any inconvenience this may cause. Your understanding and cooperation would be highly appreciated. Please feel free to contact us. Details are as follows.

### Description

#### 1. Products affected

CarbonFiber water purification material, All MiraCarbon products

#### 2. CarbonFiber specification change

Before : PAN type CarbonFiber 12K (7 $\mu$ m  $\times$  12,000)

→ After : PAN type CarbonFiber 15K (7 $\mu$ m  $\times$  15,000)

#### 3. MiraCarbon CarbonFiber water purification material specification change

By changing the material of CarbonFiber to 12K → 15K, the weight rate will increase and in order to make it the same weight as the usual products, we will shorten the width. CFK-4 width will not change but with the increase of the content of CarbonFiber, the product price will be the same but there will be no attached rope on the standard product. And the CFS-2 CarbonFiber end is changed into a loop.
